## Inspecting horticulture for export using end-point sampling

### Direction to departmental authorised officers

You must comply with this instructional material under the Practice Statement Framework.

### Direction to authorised officers

Authorised officers must exercise powers and perform functions in accordance with any lawful directions or instructions issued by the department.

---

### Summary of main points

This document outlines the procedures for authorised officers (AOs) to follow when inspecting horticulture for export using end-point sampling. It includes:

- pre-inspection tasks
- sampling tasks
- inspection tasks
- pass and failure procedures
- documentation requirements.

## Purpose of this document

This document details the procedure for inspecting horticulture for export using end-point sampling for the following commodities:

- fresh fruit
- fresh vegetables
- horticultural plants or plant products (that is, dried fruit, nursery stock, cut flowers, tissue cultures, plant foliage, cuttings, bulbs, tubers and corms) for which a phytosanitary certificate or phytosanitary certificate for re-export is required by an importing country authority.

## Definitions

The following table defines terms used in this document.

**Note:** More definitions can be found in the Guideline: [Inspection of horticulture for export](#) (the guideline)

Term	Definition
End-point sampling	A sampling method used whereby the AO removes samples of the goods for inspection in packages, after: <ul style="list-style-type: none"> <li>• the packing has occurred</li> <li>• the whole consignment has been presented.</li> </ul>
Grower	Individual or business that produces horticulture for export.

Term	Definition
Line	A quantity of goods of a single type, identifiable by its homogeneity of composition and origin, forming part of a consignment and reflected as one line on a notice of intention (request for permit).
Mixed consignment	A consignment of plant and plant products for export that is made up of various product types.
Packhouse	Facility where horticulture is washed, graded and packed for export.
Protocol	A government to government document that specifies import requirements and is bilaterally agreed to by Australia and the importing-country authority.  <b>Note:</b> Countries in which Australia has an agreed protocol with are referred to as 'protocol markets'. For a list of protocol markets see Reference: <a href="#">Table of plant export protocol markets</a> .
Recess	Parts on produce which are hard to see because light does not reach them or they are hidden from view.  <b>Note:</b> For example, underneath the calyx of a strawberry, in between the scale leaves that make up the crown of a pineapple, the navel of an orange, the petals of a flower or the rough surface area of a plant stem.
Treatment facility	Facility where phytosanitary treatments are performed.
Unit	An individual item that is considered to represent a single item of the good for the purposes of sampling and inspection.  <b>Note:</b> For example: <ul style="list-style-type: none"> <li>fruit and vegetables: 1 apple, 1 blueberry, 1 bunch of grapes, 1 banana, 1 asparagus spear, 1 dried apricot, 1 bunch of grapes (a bunch of grapes is defined as 3 or more grapes).</li> <li>cut flowers and nursery stock: 1 flower stem, 1 plant, 1 cutting, 1 bulb</li> <li>tissue culture: 1 flask, 1 tube, 1 jar.</li> </ul>

## Policy statement

- The policy and process related to this work instruction is contained in the guideline. AO's must read and comply with the policy and process requirements set out in the guideline and relevant legislation.
- Prior to conducting an inspection of horticulture for export, the AO must have achieved competency in the relevant commodity attachment for the job function HOR3002.
- Where the consignment is for a protocol market, the AO must have achieved competency in the relevant commodity attachment for job functions HOR3002 and HEP4001.
- This document is to be used in conjunction with the importing country's requirements (ICRs) listed in import permits, [protocols, work plans](#) and the Manual of Importing Country Requirements ([Micor](#)).

**Note:** Where the importing-country requirements (ICRs) contradict the requirements in this document, the ICRs must take precedence.

## Legislative framework

The legislation that applies to the inspection of horticulture for export can be found in the guideline.

## Roles and responsibilities

The following table outlines the roles and responsibilities undertaken when inspecting horticulture for export.

Role	Responsibility
AOs	<ul style="list-style-type: none"><li>Validating supporting documents.</li><li>Inspecting horticulture for export.</li><li>Recording and submitting inspection results.</li></ul>

## Work health and safety

AOs must:

- read and be familiar with Reference: [Work health and safety in the plant export environment](#)
- Read, consider and comply with work health and safety (WHS) requirements set out in the guideline
- not enter work sites unless it is safe, they are wearing the required personal protective equipment (PPE) and have considered any WHS hazards
- comply with applicable Commonwealth, state and territory WHS legislation
- comply with WHS requirements of employers and third-party sites, unless they assess the requirements as placing them at risk, in which case they must take reasonable action to ensure their safety.

### Personal protective equipment

- AOs must wear the following personal protective equipment (PPE) for horticulture inspections
  - hi-visibility vest
  - safety boots
  - nitrile rubber or polyvinyl chloride examination gloves (not latex).
- AOs must have the following PPE with them and use when required
  - first aid kit
  - water
  - sunscreen
  - appropriate emergency communication equipment such as a phone carrier with coverage or satellite phone.
- An AO must wear the following PPE where required by the work site or where they have identified a risk in the work environment
  - steel-cap boots
  - safety glasses
  - long-sleeve clothing
  - thermal clothing for cold rooms
  - hard hat
  - hair net
  - hearing protection
  - face mask

- portable gas detector.

## Essential equipment

AOs must have the following inspection equipment:

- knife and scrapers
- tweezers and probes
- hand lens 10x magnification or more
- small artist’s paint brush
- vials and tubes
- 80 per cent ethanol preservative
- snap-lock plastic bags
- labels
- pencils for labelling vials and pens for completing forms
- a device with access to the Plant Exports Management System or manual horticulture inspection record for contingency purposes.

**Note:** For more information, see Reference: [Plant exports guide – Equipment](#).

## System requirements

AOs must have access to the following systems:

- department website
- Manual of Importing Country Requirements (Micor)
- Micor Plants Documents section (username and password required) – protocol markets only
- Plant Exports Management System (PEMS)
- Electronic Export Documentation System (EXDOC) (for departmental AOs only).

## Preparing for inspection

### Section 1: How do I receive a prepare for inspection?

The following table outlines how an AO will prepare for inspection.

Step	Action						
1.	Review the inspection request details. <table border="1" data-bbox="288 1485 1342 1821"> <thead> <tr> <th>If you are...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>a third-party AO</td> <td> <ul style="list-style-type: none"> <li>• the inspection request must include the               <ul style="list-style-type: none"> <li>○ inspection appointment details</li> <li>○ request for permit (RFP)</li> </ul> </li> <li>• <b>continue to Step 2.</b></li> </ul> </td> </tr> <tr> <td>a departmental AO</td> <td><b>continue to Step 2.</b></td> </tr> </tbody> </table>	If you are... ## Section 2: How do I check the importing country's requirements?

The following table outlines how to check the importing country's requirements.

Step	Action						
1.	<p>Is there a case in <a href="#">Micor</a> for each commodity on the RFP?</p> <table border="1"> <thead> <tr> <th>If...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>yes</td> <td>continue to Step 2.</td> </tr> <tr> <td>no</td> <td> <ul style="list-style-type: none"> <li>the inspection request is not valid</li> <li>inform the client that they need to <ul style="list-style-type: none"> <li>obtain the import requirements for each commodity from the importing country authority</li> <li>email these to the <a href="#">Micor administrator</a></li> </ul> </li> <li><b>do not continue.</b></li> </ul> </td> </tr> </tbody> </table>	If... ## Section 4: How are the inspection results recorded?

- Inspection records must be completed in accordance with the Work Instruction: [Completing plant export inspection and treatment records](#).
- Results must be recorded in PEMS. A manual inspection record may be used for contingency purposes only or if an exception applies.
- Record inspection details and results throughout the inspection process.

The following table outlines how to initiate the inspection record in PEMS.

Step	Action
1.	<p>Once the sample is on the bench, begin inspecting for pests and contaminants, using your inspection equipment as required.</p> <ul style="list-style-type: none"> <li>• Check the outside of the packaging.</li> <li>• Open the package, and before handling the product, inspect the surface area whilst it is in the box.</li> <li>• Tip out or remove the product, even if the packaging is transparent, and inspect the inside of the packaging, including all inner linings and sub-packaging.</li> </ul> <p><b>Important:</b> Do not open sterile tissue culture flasks.</p> <p><b>Note:</b> Heavy commodities in bulk bins do not have to be lifted onto an inspection bench however there must be sufficient lighting over the bulk bin and each unit removed.</p>
2.	<p>Inspect the entire surface of each piece of product by turning it over, one unit at a time.</p> <p><b>Notes:</b></p> <ul style="list-style-type: none"> <li>• Do not roll the pieces along the inspection bench as a means of inspection.</li> <li>• Inspect all recesses and sheltered sites on the outside of the product in detail, making sure there is adequate light to penetrate into these areas.</li> <li>• Use a magnifying lens of at least 10x magnification where required, for example to examine recesses, pest symptoms, inside the product or when a pest is found.</li> <li>• Where there are signs of internal feeders such as holes, frass, damage, decay and softness, cut the product using a slicing or conical cut, to see if any pests are inside the product.</li> <li>• Inspect any remaining debris on the inspection bench for pests and contaminants.</li> </ul>

## Inspecting resubmitted goods

### Section 15: How do I inspect a resubmitted consignment?

The following table outlines how to inspect a resubmitted consignment.

Step	Action						
1.	<p>Before inspecting, ensure that:</p> <ul style="list-style-type: none"> <li>the client has submitted a new RFP (if the composition of the consignment has changed) along with a copy of the original RFP and inspection record</li> <li>the client has provided written notification that the consignment previously failed inspection, and the method of reconditioning applied</li> <li>when applicable, the client has provided evidence that the treatment applied has treated the pest/s or contaminants found.</li> </ul> <p><b>Important:</b> Evidence of treatment effectiveness against a pest would only be required if an AO or the department had reason to believe that the chosen reconditioning treatment did not address the biosecurity risk found in the consignment.</p>						
2.	<p>Has the consignment been treated with a fumigant, chemical treatment or controlled atmosphere?</p> <table border="1"> <thead> <tr> <th>If...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>no</td> <td><b>continue to Step 3.</b></td> </tr> <tr> <td>yes</td> <td> <ul style="list-style-type: none"> <li>take a copy of the treatment certificate</li> <li>for fumigations, check the gas-free certificate to determine the date and time of gas clearance to ensure that any exposure, airing periods and safety precautions have been completed</li> <li>take a copy of the gas-free certificate</li> <li><b>continue to Step 3.</b></li> </ul> </td> </tr> </tbody> </table>	If...
